TECHNICAL SKILLS

Backend & System Design: Node.js, TypeScript, Express.js, REST API Design, Authentication & Authorization (JWT, RBAC), Middleware Architecture, Secure Backend Development, Scalable API Design

Databases & Data Modeling: MongoDB, PostgreSQL, MySQL, Prisma ORM, Relational Data Modelling, Query Optimization

Python & Modern Backend: Python, FastAPI, Data Processing, Resume Parsing & Scoring Systems

Security & Engineering Practices: Input Validation, Secure File Handling, API Security, Error Handling, Logging, Role-Based Access Control

Frontend (Working Knowledge): React.js, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS

Tools & Platforms: Git, GitHub, Postman, SQL, Linux Basics, Docker, Docker Hub

EXPERIENCE

Web Developer

Cynox Security LLP

Apr 2025 – Present

Delhi, India

- Streamlined previously scattered task tracking across teams by developing an internal Task Management System, enabling structured workflows for 20+ active users and supporting 200+ concurrent API requests through asynchronous job processing and optimized database queries.
- Implemented secure authentication, RBAC, audit logging, and approval workflows improving compliance tracking and operational visibility.
- Conducted technical interviews for entry-level web developer candidates, assessing projects, fundamentals, and problem-solving ability, and contributed to hiring discussions.
- Delivered continuous feature enhancements and production fixes improving reliability and performance of live systems.
- Rebuilt the company website in collaboration with stakeholders improving usability and client engagement.

Software Engineer

North Delhi Public School

Nov 2023 – Sep 2024

Delhi, India

- Worked on institutional datasets using Excel for cleaning, structuring, and analysis of admissions and student records.
- Supported website development using WordPress and PHP for enquiry and data collection workflows.
- Used Excel, WordPress, PHP, HTML/CSS, and basic SQL for web and data workflows.

PROJECTS

Task Management System

- Built a backend-centric task management platform using Node.js, Express.js, Prisma, and MySQL with modular REST APIs.
- Implemented secure authentication using JWT, RBAC, bcrypt, Redis rate limiting, and reCAPTCHA protection.
- Designed distributed background job processing using BullMQ and Redis for notifications and reporting.
- Performed concurrency testing supporting 50+ active users and scalable architecture for hundreds of concurrent API requests.

Professional Invoice Generator (PIG)

- Built a full-stack invoice management system using React, Node.js/Express, and PostgreSQL (Prisma) with a decoupled REST architecture.
- Implemented secure authentication (JWT + Google OAuth), role-based access control, and middleware-driven validation for protected APIs.
- Containerized the application using Docker and Docker Compose, publishing images to Docker Hub for reproducible deployments and streamlined environment setup.

Advanced Resume ATS & Intelligence Platform

- Built a resume intelligence engine improving job-match scores from 40% to 70% across 90% of evaluated web development job descriptions using TF-IDF semantic matching and rule-based scoring.
- Designed a multi-factor scoring system generating structured ATS feedback for resume evaluation and optimization.
- Load tested using k6 achieving 600+ requests/sec with p95 latency under 300ms for 200+ concurrent users.

EDUCATION

Indira Gandhi National Open University (IGNOU)
MCA Information Technology

2025 – 2027
New Delhi

Deshbandhu College
BSc Computer Science

2021 – 2025
Delhi

ACHIEVEMENTS

- Google IT Support Professional Certificate
- CCBP 4.0 Intensive – NXTWave

LANGUAGES

- English – Professional Proficiency
- Hindi – Native Proficiency
- Japanese – Basic (JLPT N5 exam scheduled July 2026)
